

THE SOLUTION MASTER: VOLUME 1

- Asking Questions to Giants who have high handed approach, with high impact inbuilt Answers to revolutionize, and for further evolution of human society
- Asking without hurting and damaging image of any individual, organization or nation or any other entity
- Raising issues without fear, only for the survival and sustenance of human civilization
- Raising brave issues to benefit masses as well as classes, around the world
- There is more value and profit in values based, enlightened, aware, and conscious total human society than in/ with ignorant society in coming future

AUTHOR:

DR. ASHISH MANOHAR URKUDE

Preface, Introduction, Forward, and Heart and Soul felt thoughts:

1. Why raising right question at right time at right place to right people is important in this ever changing and transparent world, especially in front of those who are willing and conducive for this democratic approach?
2. How the question can bring revolution, evolution, positivity in human society?
3. Why generally tough questions are not raised?
4. The questions can be raised after in-depth studies and analyses. Thus, what is the science behind the master questions? How the “Tark-Shastra” an ancient Indian Science was perfectly based on raising right question and logical thinking? What are the human psychology, art, commerce, economics and medical science behind the tough questions?
5. Who can raise such questions?
6. Why World Bank, allows, such tough questions to be asked to their experts, when many such organizations even do not entertain questioning them or their authorities?
7. Why only three countries around the world have the best democratic system in the world, viz. India, United Kingdom and the United States of America, and why other countries fail to raise bar of their democratic system?
8. Which are the ‘places’ those encourage raising tough questions? Where are the toughest questions not allowed?
9. Why finding solutions to toughest questions today, than waiting for apocalypse is important? Will future generation excuse us for not finding solutions to these toughest questions? Will human civilization survive if these questions are not taken care?
10. If we human beings don’t raise these questions our mere existence will be at stake, hence, these efforts.

11. Finally, how to put solutions in the questions itself so that it becomes implementable in future?

Sample Questions those have been raised in UNO, WB, WEF kinds of organization and which are having potential Solutions to world level problems, and those, which have moved near and dear ones including students:

1. Question on: Children's Education, meeting MDG and making UNO a Worldwide Regulatory/ Governing Authority:

(It was asked to His Excellency the Honorable Secretary General of UNO and the Honourable President of the World Bank):

Dear Hon. Mr. Ban Ki Moon, and Hon. Dr. Jim Yong Kim,

Warm Greetings.

Education to children and MDG goes hand in hand.

Please allow me to be honest on this question.

Educating the children requires pro-activism and it can be done with the help of NGO's, SHO's, Government and other non-government organizations and motivated honest individuals and technology and procedures and systems to support. It's our experienced fact that, the little children migrate with their parents, while their work shifts to other cities in many cases in India and Bangladesh, if you take a case of millions of Construction Workers and casual labors.

Don't you feel it's the job of Government machinery to keep track and provide education system and procedure for these children, though, its job beyond 10 am to 5 pm office hours?

Why couldn't the technology and procedures be developed for these activities?

Why can't it be done in deadlines of 10 years or 25 years?

Trust me, if it's not done with deadlines, in the year 2100 A.D. we'll be discussing the same things.

Thus, don't you feel UNO and WB should be Regulatory authority of the world by now to achieve it?

Hoping to include this point in your discussion, please, also if required, honestly, I can become part of it.

Thanks and Regards.

Yours Truly,

Dr. Ashish Manohar Urkude, (Ph. D. Management), India

2. "With the speed they are implemented around the world, MDG's seem to be pipe dream," an elderly professional predicted this last month, further he said, "Every time, World Bank and UNO pass on the buck of implementation on the states/ nations. Thus, no one takes responsibility of its failure. This world will remain like this forever." Do you think, by the time, a man grows older he becomes negative about implementation ability of WB and UNO and Government of any nation, especially over MDG issues?
3. According to statistics, Top 20% and bottom 40% both have more than 95% of their children not studying at schools or in other words are not sending their children to schools in lot of countries in Africa. What are the steps the World Bank is taking to help these African countries realize the importance of education? Is World Bank acting proactively or not?
4. **Question on: Though UNO and WB have support from all top bodies around the world, why they pass the buck to states/ nations on achieving MDG?:** Millennium Development Goals (MDG) seems to be pipe dream today as UNO and World Bank put the buck on the states/ nations as they do not act, and it seems even after a million years we'll be discussing such goals for ever, due to human greed and the psychology that 'others will implement and I'll keep my house safe and in peace'. Do

you agree with this? Thus, why UNO kind of organization which have support from all the national Governments around the world, have support from all the NGOs, have support all the SHOs, and have support also from all the Top Religious bodies; cannot become Super Government of the world and the World Bank becomes Federal Bank of the world? OTHERWISE ALSO, IF HUMAN CIVILIZATION EXPANDS TO MOON, MARS AND BEYOND WE'LL REQUIRE SUCH GOVERNANCE, THEN WHY SHOUD WE NOT START IT FROM TODAY ITSELF? THIS QUESTION I'VE BEEN REPEATEDLY SINCE LAST 35 YEARS, WHEN I CAME TO KNOW ABOUT U.N.O. IN 8TH GRADE. BUT, I DIDN'T GET REPLY ON THIS. HENCE, KINDLY ANSWER IT.

5. WHY NOT U.N.O. BE AN ORINATION WHICH IS INDEPENDENT AND DECISIONS MAKING BODY AND NOT JUST A KIND OF DEPENDENT NGO'S LIKE BODIES AND PUPPET IN THE HANDS OF FEW NATIONS? WHY CAN'T IT BE SUPER GOVERNOR AND SUPER REGULATOR FOR POLITICS/ PROGRESS / PEOPLE'S WELFARE DECISIONS MAKING BODY, TO SAVE THIS EARTH FROM WARS, AND MAKE IT SAFE AND SUSTAINABLE BASE FOR HUMAN EXAPNASION TO MULTIVERSE? I'm concerned about this world hence this direct question.
6. MDG SEEMS TO BE PIPE DREAM WITH HIGH HANDED APPROACH: Since long I have been saying MDG seems to be pipe dream looking at the high handed approach. Why can't we've a realistic planning for extended time of coming 25 years, with transparency in planning and implementation at each and every micro level? Why can't WB itself disclose it's each and every penny spent on it's website so that it builds trust among people, the common man to the people who sponsor? Otherwise, it will continue for ever and MDG will be discussed by my great-great-great-great grand children with your counter parts. Like what we say in India UNO and WB will become decorative organisation unless and until, UNO acts as a Inclusive Super

Government of the world and WB acts as a Inclusive Super Federal Bank of the world as regulator and policy makers and controller and implementer. Even if humans go to Moon or Mars, they will require such United but Democratic Government, then why not it starts now, so that MDG are achievable? If this world is serious then, please answer this unanswered question till date. I've been saying this (About super government by UNO) since my childhood that is since 1979 ('The year it was declared international year of Child'-English/ 'Vishwa Balak Warsh'-Hindi), when first time I came to know about UNO, but, people laughed at me, hope you listen to me now as expert myself, and, if you don't listen to me, take my prophecy we'll be laughed by next generations, hence, also, expect this question to be part of your discussion

7. **Question on: Humans Fighting wars with each-others for millions of years is anti-human:** Why should United Nations of Organization (UNO) waste time on issues like Indian and Pakistan war, Israel-Palestine war, China-Japan Conflict, UK-Argentina conflict, NATO forces in Iraq, North Korea- South Korea conflict, Vietnam-China-USSR-USA conflict, and previously USA and USSR cold war issues, and ARE HUMAN BEINGS GOING TO FIGHT WARS WITH EACH OTHER FOR MILLIONS OF YEAR? IS IT EVOLUTION OR DEVOLUTION OF HUMANS? I RAISED THIS QUESTION SINCE CHILDHOOD i.e. SINCE 1983, BUT, PEOPLE LAUGHED AT ME, HOPE YOU'LL ANSWER THIS QUESTION IN RIGHT SPIRIT BEING UN-SG.
8. **Question on: Classical Solutions:** Why the classical decisions like union of India, Pakistan, Bangladesh similarly, union of North and South Korea like decisions are delayed that can solve the fantastic problems of the world? Why War and division of countries like decisions always win, also, are human beings going to fight for millions of years among themselves on caste/ race, country, religion like petty issues? Why progress of all the nations and whole earth is called utopian idea? Why only we

talk about making literate one country only and why those countries do not help other countries to get 100% literacy? Thus, why not MDG being taken seriously by all the states on the earth?

- 9. Question on: IPR and Technology Quest:** Will human quest for energy needs be fulfilled in next millennium, if the solution is not found out immediately or if found out but ‘dumped’ as Intellectual Property Right? I’m using dumped word because the technology in use gets up graded at every moment and not if it is dumped as patent? Trust me, suggestions comes more from common man than any other qualified or experienced person.
- 10. Question on: Why can’t Noble Prize be awarded only if there is total eradication of Child Labor is there?** Just see the Photograph of Child labor. Even when people are getting Noble Prizes for peace, Bharat Ratna the highest honor of India, The Lord title, and many such titles around the world, why there is no peace on earth? Why to keep such decorative prizes, till permanent solution is not found? Why child labor, trafficking, bullying continues? Don’t we want to find permanent solution to this? What are UNICEF, Governments, NGO’s, SHO’s doing and why are they not successful till date? One person once said, “These are all show-off organizations and are puppet in the hands of bullying countries or people around the world, and don’t expect anything good from them.” I’m still failing to explain contribution of UNO to him. Though I tried to explain how, UNO, have succeeded in stopping 3rd world war, etc. Hope, I failed to explain but UNO and WB top authorities will touch this point in their all-important discussion.

Photograph: Child Labor in Dehradun, caught live, on the day an Indian got Nobel Peace Prize (Why cannot Noble Prize be awarded only when children related problems are fully stopped?)

11. **Question on: Not walking the talk?:** Why people or organizations with authority or power sometimes act juxtapose, i.e. they say something in favor but act in opposition or vice-versa in international politics? Doesn't it go against noble people's 'think and walk the talk' principle? Where are ethos, principles, honesty, truthfulness.....?
12. **Question on: Not solving problems of common man is anti-human stand:** Why some questions are answered and others are not, even at UNO and World Bank level? To whom the common man will look in case these topmost organizations and Governments do not deal with such problems? Is it not anti-human?
13. **Question on: Survival of earth in case of outer space material impact:** SCIENTISTS HAVE PROVED THAT A COMET OR METEORITE LIKE OBJECT DESTROYED THE DINOSAURS ON EARTH. THEN, WHAT ARE THE ALTERNATIVE PLANS FOR HUMAN CIVILIZATION IF THAT HAS TO OCCUR AGAIN? WHY SUCH PLANS ARE NOT DISCUSSED IN UNO? SCIENTISTS ALSO HAVE DRAKE EQUATION OF EXISTENCE OF ALIEN WORLD,

THEN WHY WE DON'T DISCUSS A PLAN TO EXPAND HUMAN CIVILIZATION? WHY CAN'T WE HAVE MOON STOCK EXCHANGE IN 2030 AD AND MARS STOCK EXCHANGE BY 2050 AD. WHY PEOPLE LAUGH AT ME WHEN I RAISE SUCH ISSUES IN TOP CONFERENCES? IS WORLD NOT READY FOR SUCH RESEARCH AND DEVELOPMENT?

- 14. Question on: Local citizens being part of local project:** Why not the suggestions of local citizens be used while developing the local projects? May it be India or South America or any places on earth?
- 15. Question on: Everyone is Talented, but why can't it be used?** There is no dearth of talent in this world; everyone is talented in something, some way or other, why this talent is not utilized properly? Why experts always have to apply for job? Why can't World Bank or UNO reach genuine candidature? Why really genuine candidatures are always sidelined, even at these top brass organizations in the world? Is honesty a qualification or disqualification in such cases? One of my students asked, "Do I've to be sycophant of VETO power nations to get hired in UNO or WB besides my top class qualifications and experience in future?" I had no answer; hence, raising this issue, hope you'll touch this point in your all-important discussion.
- 16. Question On: Transparency:** Why not the Balance Sheet with each penny / cent/ franc/ rupee details of World Bank is put on WB website, every year? If World Bank set a bench mark then only others will follow otherwise corrupt practices and favoritism will continue in this world. Sorry for direct expectations but... tell me to whom and to which organization the youth around the world look at as an ideal organization for

such activities? Why not we've Super Chartered Accountant for these activities?

17. Still my last year's question is not answered, why not World Bank starts from itself, and make all possible data open to public to let know, how, transparently they are working for betterment of this world and provides account details of each penny it spent on each activity. Then it will become bench mark for nations/ states, and then there is no looking back.
18. **Question on: Once there is Expansion of human civilization to Multiverse Earthiens will be called backward race?:** In case human civilization expands to Moon, Mars and beyond, will not they consider Earthien that humans living on earth, as a backward race? I had given a plan to expand human civilization in our solar system and beyond, in 2004, 2006, and 2007 to UNESCO bodies. It also included, even the kind of education required to be given candidates going there, contacted NASA, CERN, ISRO, ROSCOSMOS, and other organizations, since 1996, but, why didn't I get a call to implement it, do I've to apply again and again, and are the jobs fixed or are they act separately and are going to fight for land on Moon, Mars and at every planet in future? Also, are we going to waste time or invest time in future on such issues of importance, to sustain human civilization? Trust me, if we don't act on such vision, we'll perish on earth and will continue fighting with each other for millions of years, and there will be no evolution of human beings. I'm the only one who have raised this issue on my blog www.managementengineering.blogspot.com and 21 people voted for expansion of human civilization to moon, mars and beyond, and Mr. Edvin Alderin (Buzz Alderin the moon lander) is aware about this, as he read my question but didn't answered this question, may be because of fear, or he might have thought I'm not an important person and hence may be ignored. Hope

my un-answered question will be answered in this all important WB discussion.

- 19. Question on: Corruption will annihilate human civilization?** : Trust me, in case, corrupt practices continues, then first earth will get polluted, then all water bodies will get polluted, air will be difficult to breathe, then sky will become unlivable and then minds and brains will get polluted.....then, will we survive or perish? Why can't there be 'terminal solutions to corruption around the world'? Also, USA, India, Russia, China and other powerful countries makes 10 million army, together, are they not powerful enough to tackle any corrupt personnel/ organization/ nation with all their might? Why are we separated on such issues? Why can't 99% good people fight with 1% corrupt people or terrorists or bad people in society? Also, most of the environmental pollution is due to corruption only, and hope this point will be discussed in your all-important discussion.
- 20. Question on: Right To Education (RTE):** Right To Education is present in more than 135 countries around the world, then why there is lack of 'total education' and 100% literacy, in all these countries? Why we see, children working in hotels or on road in India and other countries? Why can't policy makers and implementers work together, and why it's not successful like pulse-polio-drive in India? WHAT KIND OF LEGACY ARE WE GOING TO LEAVE FOR NEXT GENERATIONS, IN CASE WE LEAVE MORE ILLITERATE THAN LITERATE HUMANS IN THIS WORLD?
- 21. Question on: Are we inviting health risk by Flushing Viruses and Bacteria out of their home?:** Are we not flushing bacteria, viruses, and other unknown species out of their den due to deforestation and pollution? Thus, will we not be in trouble in future on health issues? Then how can MDG be met?

22. **Question on: WTO and India:** India faced extended monsoon this year. In Himalayas the 100 meters or even more foundation of buildings get washed away in such incidences, especially on monsoon side of Himalayas than Chinese side, thus, don't you believe that in future most of the state funds will go in infrastructure maintenance? Also, don't you feel, this region cannot survive without subsidies? Hence, I think, WTO should have different approach for different states according to local and global conditions. Hope you'll touch this all important question in your important discussion.
23. There are few fragile areas in the world like the Monsoon side, i.e. Indian side of Himalayas, which cannot run/ survive without subsidies, Kedarnath tragedy have proved it. E.g. We need to build/ construct/ repair the roads 4 to 5 times a year, just watch the videos of this Himalayan tragedy, the whole base/ foundation itself of 100 feet underneath is washed away many a times...etc. problems are there...Hence, hope WTO ... WB ...and thus UNO understands this point, and understand the Indian side over this issue. Please note...more than 100 million population is associated with my question...Thus, if such issues are favorably understood then only someone can say this discussion will be really MULTILATERAL, of course dealt by multilateral banks and agencies....otherwise we feel it is monotonous discussion.
24. **Question On: Meeting M.D.G. within Deadline:** Cell phone, Radio, Television, and the whole Information and Communication Technology is the fastest to reach at the grass-root level. Then, why the idea of Millennium Development Goals (MDG) did not reach at the grass root level around the world. Where exactly UNO and its organizations like WB...are failing to reach grass root level? I've been to many MBA schools and those even MBA students do not know what are MDG, leave others (including governments who do not take MDG seriously as per WB) aside, hence, this obvious question. Hope the question is taken positively and UNO and WB will try to find out an innovative solution on this, to make MDG happen.

25. Question On: SOCIAL ACCOUNTIBILITY: We can talk about Social accountability, as much as we can, but "Who is to be held responsible(?)" for bad road conditions, non-working of the government machinery in some cases, insurance companies like threaten to collect premium from its customers, electricity is not there but bills are there every month, telephone doesn't function well but bills are there every month, many road and other infrastructure projects are left without completion, if common man goes to court/ legal the judge seems to be got manipulated by rich individuals or companies,...etc. It's not happening only in India but we've seen elsewhere too. What could be the solution? Who has to be held responsible? What will be the role of World Bank to correct this system in so many countries? How UNO, WB can fix this accountability problem?

26. Question on: REALITIES OF POACHING IN JUNGLES AROUND THE WORLD:

We heard sitting at their office, few people including forest rangers, can tell in some instances, who (with exact name and address) has done that poaching in that particular area or who has done theft in that particular area. It's a world known fact by now in many Jungle areas. Now, kindly let us know, the exact reason why it can't be stopped, if such a good intelligence system is available, cameras are available, andWho provides the loopholes in the system to poachers? Don't you think it seems fishy if someone says poaching can't be stopped? Dr. Jane, I hope you will touch this point, please.

27. Question on: ENVIRONMENTAL ISSUES:

It has been observed that while widening of roads, the trees that are in way could be up-rooted and then could be re-rooted at some other place, can be done, may be at night times, but do not happens in India. It's been standard practice at other places in the world. Hope you agree that, there would be imbalance in nature if it's not done. We've observed that, it also have provoked corrupt practices in India, hence, would like to ask, Have you touched this point in your book?

- 28. Question on: Exploitation of Himalayan Jungles:** Many of the rare medicinal seeds, shrubs, fruits, flowers, roots, trees, etc. are available in Himalayas. On the name of Herbal / Ayurvedic Medicines top MNC buy such medicinal shrubs at negligible cost here, we've seen, and they sell their medicines a million times higher prices in global market. Could you please evaluate cost and value of this till the day of this discussion and make a comment on this?
- 29. Question on: KNOWLEDGE MUST BE FREELY AVAILABLE AND THAT TOO AT FREE OF COST:** We in India have believed since millions of years that the knowledge that is necessary to survive must be available free of cost to everyone, otherwise, how would we survive? It's time, we make all the necessary and authentic knowledge and authentic data available free of cost, patent free and copyright free, and it's free to all and is available for any point on the globe and beyond. Hope these points will be discussed in this important discussion.
- 30. Question on: WOMEN'S RIGHTS when EVEN U.S.A. COULD NOT FIND A PRESIDENTIAL CANDIDATE: Empowering women....To Hon. Hillary Clinton..** Women are deprived from decision making bodies as top level men expect to continue the dirty politics, hopeless-economics, wars and terrorism, and dirty business. Otherwise, why USA couldn't find a woman Presidential candidate? Why women in India could not get 33% reservation in parliament? Similar cases could be found in Russia, China, France, Japan, and top countries around the world. Deprivation of women has stopped human evolution in recent times. If human civilization has to expand to places, we need to evolve at this front, then only we'll sustain or we'll perish. Hope you'll touch this point in your all-important discussion.
- 31.** I think it's not problem of Vietnam only. Even USA could not find a better Women Presidential Candidate yet, in their history. It's a Universal Problem. Probably Politics and ruling is not yet a clean job, in human history. However, being relatively

smaller country Vietnamese can find the better solution over more women contribution towards the nation through its parliament. It could start from a local or a corporate or sports or an education institutional leadership and the candidate can be nurtured to the level of national leadership. We've tried it in India, and we had a women President, Chief Minister, Governors of the provinces and perhaps the strongest woman Prime Minister till date, using this method. Mrs. Indira Gandhi was nurtured this way by her father and the well-wishers, since her child hood, including Hon. M. K. Gandhi (Mahatma Gandhi-ji). Hope this point may be discussed in this all important discussion.

- 32. Question on: ZERO WASTE OF FOOD and FOODGRAINS:** At our locality, we waste 'Zero' food. The reason being many follow the concept called limited daily food consumption. However, it's been observed that it's the five star or above hotels those who waste more food. What can be done? Another observation is wastage of food-grains while they are stored, even 1% of 100 million metric tons become 1 million metric tons of waste, if we take case of India. Don't you feel immediate action is required on it? What could be the modified role of the World Bank in future when it comes to all these activities?
- 33. Question on: AUTHORITIES AROUND THE WORLD ARE NOT READY FOR DIRECT DEMOCRACY?:** We had hot discussion and SWOT analyses recently and we found that this world is not ready (at least the authorities holding top positions) at present for direct democracy and transparency and openness, though we all youth around the world in all countries demand it. What are your opinions on these? What could be the process to achieve it in every country?
- 34. Question on: Railway connectivity from Varanasi to Mecca to Jerusalem to Rome:** THERE ARE OVER TWO BILLION PEOPLE TRAVEL TO VARANASI, MECCA, JERUSALEM AND ROME KINDS OF LOCATIONS AROUND THE WORLD EVERY YEAR TO SATISFY

SPIRITUAL AND RELIGIOUS NEEDS OF THEIR SOULS. THEN WHY THERE IS NOT CONSTANT, CONTINUOUS RAILWAY SYSTEM BE CONSTRUCTED THAT CONNECTS ALL THESE PLACES? Let spiritual and religious people travel on all these places at lesser cost than today's exorbitant airways costs. Don't you feel it is more feasible than increasing carbon footprint? I hope even Popes, Swamis, and other religious bosses will also agree on this. Also, why not we've such railway systems, having advanced technologies be there from Nagpur to Moscow, Nagpur to Dubai, Nagpur to Beijing, Nagpur to Tokyo, Nagpur to Singapore, Nagpur to Sao-Polo, Nagpur to Sydney, Nagpur to North Pole, Nagpur to South Pole, etc. When I raised this question on major projects in travel and tourism, people ridiculed me, and this question was rejected by World Bank several times, hope you'll touch this question this time.

35. Why the railway projects like Kaba to Rome to Varanasi to Jerusalem cannot be thought to connect all religions? Why not North Pole to South Pole railway project is not been thought....ok....why not Delhi-Beijing-Moscow-....to London....to...Helsinki....project be implemented? Why not American-Russian Railways be thought they have only few hundred kilometers of sea in between them...Why Kolkata to Singapore Railways be planned? Why Mumbai to Karachi railway link is not there? Are Human-beings going to fight wars for millions of years? Are not our experts/ expertise and resources lost in wars?... Why human-beings do not implement a war pact for 100 years? Then if all these fantastic projects are implemented the earth will look like heaven. Trust me.

36. Long lasting and Sustainable infrastructure built up is possible only if we stop wars, which not only destroy existing infrastructure but also expertise and humans who built it. Thus, it's a loss for that country as well as for the whole world. Do you agree on this? Is it possible that humans do not fight wars for 100 years, for such infrastructure built up and promise they will not break the bridges constructed earlier?

- 37. Question on: WOMEN AS PART OF DECISION MAKER and HAVE SAME SALARY/ WAGES:** First thought raised by women here in India is; are women getting same position same wage/ salary or not? Another point is, are they made part of decision or not? What are Health, Safety, and other short and long term benefits and facilities they are getting?
- 38. WHY WOMEN ARE LESS ACTIVE IN POLITICS AROUND THE WORLD, IS IT NOT GOOD PROFESSION?:** Why women are less active in politics around the world? Why even USA could not find a good Presidential candidate till date? Why can't be politics, ruling, governing of nations be made clean enough, around the world, to accommodate both the genders? IF IT HAPPENS THEN ONLY HUMAN CIVILIZATION CAN SURVIVE FOR B/MILLIONS OF YEARS, OTHERWISE, CORRUPTION, ENVIRONMENT AND OTHER PROBLEMS WILL WIPE IT OUT ON EARTH. Hope this question will be dealt in your discussion.
- 39.** Women are deprived from decision making bodies as top level men expect to continue the dirty politics, hopeless-economics, wars and terrorism, and dirty business. Otherwise, why USA could not find a Presidential candidate? Why women in India could not get 33% reservation in parliament? Similar cases could be found in Russia, China, France, Japan, and top countries around the world. Deprivation of women has stopped human evolution in recent times, is what I feel. If human civilization has to expand to multiple places in this universe and multiverse, we need to evolve at this front, then only we'll sustain or we'll perish that's for sure. Hope you'll touch this point in your all-important discussion.
- 40. Question on: GENDER EQUALITY AND MDG:** If gender gap has to be reduced it must be reduced in Politics and Governing of every country. Otherwise, inclusive growth, health to each child, education to all, better infrastructure, free will, and human progress, would be just terms used in Utopic language of Economics. Hope, you all agree on this issue and will have discussion on it, in your, all important discussion.

- 41. Question on: NO WAR FOR 100 YEARS, BUT, ONLY INCLUSIVE GROWTH AND MODIFYING VETO POWER FOR THAT IN U.N.O.:** I've same question that I asked in the Gender Equality, why couldn't USA find a Woman President till date? My second question is, is it possible that we make a common foreign policy agenda for 100 years for all the countries that, there will be no war from 2015 AD to 2115 AD, and will talk about development of this world at all the fronts, and we meet the MDG. Is it possible to modify foreign policies for USA or Veto Power Countries and all the member countries of UNO, for this no-war, only inclusive-progress? Also, WHY CAN'T BE VETO POWER BE CANCELED ON SUCH ISSUES IN UNO? Please suggest/ guide.
- 42.** I have a direct question to all the world leaders. Again. Since early childhood I've this question. Are India and Pakistan, Israel and Palestine, North and South Korea, UK for Falkland with Argentina, China and India, finally Cold War giants USA-UK-France and Russia, going to fight for millions of years? Are human beings not going to evolve for peace, from barbaric to god like souls? This is THE MAIN HURDLE in this part of world before the economic integration. This is the world level problem. Hope this point will be discussed in your all-important discussion. Hope you'll not ignore this important question cum solution to many problems of the world.
- 43. Question on: INCLUSIVE GROWTH IN EURASIA:** Hope this diversification in development is also dealing with inclusive growth and favors all the regions in Eurasia? The reason to raise this question is may be after some decades later we'll be discussing, developed, developing and under developed regions in Eurasia despite the so called blessed natural resources. Hope you understand the crux and will add this point in your all-important discussion.
- 44. Question on: INVOLVING ALL THE UNIVERSITIES AROUND THE WORLD AND ALL THE YOUTH IN U.N.O. AND W.B. ACTIVITIES:** It has been observed that some Universities have more influence than others on Global

Development, though, every University passes out millions of graduates in the course of time. Can we have a program in which every university can (in fact should) make a contribution? This will improve the quality of graduates around the world, hence this question. OTHERWISE, FOR MILLIONS OF YEARS GRADUATION WOULD BE THERE, BILLIONS WILL GRADUATE BUT, WITHOUT ANY SIGNIFICANT DIFFERENCE, VALUE AND IMPACT ON THE GLOBAL DEVELOPMENT ON EARTH, AND ON FURTHER FRONTS, ESPECIALLY EXPANDING HUMAN CIVILIZATION ON MOON, MARS AND BEYOND.

45. **Question on: INCLUSIVE GROWTH WHEN TECHNOLOGY IS DEVELOPING FASTER THAN IT CAN BE IMPLEMENTED IN DAILY LIFE:** Reaching to every village has always been challenge, similarly, transport in all whether conditions has always been a challenge to humankind. Do you think, that, in coming decade, we would be able to overcome these two problems in all countries? The reason raise this question is, many people feel technology is developing at faster rate than actually it can be implemented and used in daily life.
46. **Question on: CLIMATE CHANGE AND REACH OF WB TO SME: PROBABILITY OF CLIMATE REVERSING SEEMS TO BE ZERO, NULL AND VOID,** thus change will be the only constant in future businesses. Hence, my question is, how would World Bank develop its policies for sustainable businesses, with various countries? Also, how will World Bank reach to SME's and micro enterprises and help them sustain? Computers and Internet are still inaccessible to them, as either they don't have employees who can operate Computers or they can't afford it, I've seen it in recent visits to more than 1000 SME's and small agro businesses in distant villages in India, hence, this question.
47. **Question on: INDIAN GOVERNMENT TACKLED THE CYCLONE PHAILIN SUCCESSFULLY:** Congrats to Government of India for reducing the losses during and before

the cyclone Phailin. However, when people watched the aftermath, they found that the people had nothing to stay and could not return back, as they had no shelter and living machinery. Hence, my question is, what is the future course of action for these cyclone affected people? ALSO, WE'VE SEEN IN UTTARAKHAND THAT SOME PEOPLE ARE NOT WILLING TO GO BACK AND STAY AT HILLS AGAIN. IS THERE ANY PLAN OF GOVERNMENT OF INDIA AND THE WORLD BANK TO REDUCE THIS FEAR PSYCHOSIS AMONG PEOPLE AFFECTED? ALSO, IT'S HIGH TIME WE MUST PLAN NO-LIVING ZONES IN INDIA, WHERE, WE THINK THERE IS CHANCE OF EXTREME DISASTER/S, IS WHAT I STARTED FEELING. This will also take care of Ecology as well, ex. Mangroves will be protected near sea; and the Hills and Forests will be protected in Himalayas, thus reducing the impact of future disasters. Do you agree to this, please?

48. Question on: WOMEN REVERENCE: We in India respect our Mother as Goddess. In fact, we treat our parents as our first Guru/ Teacher/ Coach/ Mentor in fact everything. In joint family we respect all the elders. We involve all, including mother, wife, sister, daughters, and even grandmothers, in every important decision, that we take at home. If same thing happens everywhere including homes, offices, government, public places, with all ethics and values, hope violence against women will vanish. Hope, all of us have similar views. Do you agree over this?

49. Question on: ENTREPRENEURSHIP AND WORLD BANK TAKING JOB OF TRAINING THE TRAINERS: My first question is, can the World Bank take job of Train the Trainers of various countries, who are helping youths to start the business, so that more than a million Youth Entrepreneurship start within the span of next 5 years? My second question is, can the World Bank proactively help governments around the world to reduce the lengthy procedures to start the business in various/ respective countries? This question is obvious in case we have

to generate more than a few million jobs/ year, in coming decade. This question also has its importance as the solution to this will also boost the spirit of youth brigade from various countries to venture for Entrepreneurship. If in Denmark a business can start within 8 minutes and government supports it, then why cannot it happen in other countries? Why not doing business be easy in all places around the world? Why cannot WB proactively support the states in place of showing them their place by conducting surveys? OR otherwise take some stern action by becoming world's federal bank. We've high expectations from UNO and WB as you've top pool of talent, but, in case in coming decade nothing happens, youths around the world will be intolerable asset for authorities as there will be more than 2 billion jobless youths. Hope such serious matters are discussed in open forum like this, should have action plan displayed to public, and are acted upon proactively in place of on demand.

50. **Question on: MDG AND HEALTH ISSUE IN THE CASE OF FLUSHING OUT ALL THE VIRUSES AND BACTERIA OUT OF THEIR DENS:** We're flushing out all the viruses and bacteria out of their dens, with chemicals, global warming, by deforestation and by encroaching their space. Then how will we define, impact on health measures we're taking today? It'll also have impact on our MDG on health issue.
51. Are we flushing/ pushing the viruses and bacteria out of their nest and inviting to our human domain? Same thing happened in India with Tigers, hence, this obvious question.
52. **Question on: MDG NOT TAKEN SERIOUSLY BY ANY COUNTRY/ STATE:** Obviously each and every country should take MDG seriously to achieve this goal. Do you feel this is not happening? Another point is do you feel the same that MDG are related more to the masses than the classes? The reason to ask both of these questions is, MANY TELEVISION NEWS CHANNELS CLAIM THAT HEALTH ISSUES OF MASSES ARE NOT TAKEN SERIOUSLY, BUT HEALTH ISSUE OF CLASSES IS TAKEN SERIOUSLY, BY ALL THE

GOVERNMENTS AROUND THE WORLD, WITH THE EXCEPTION OF PULSE POLIO VACCINATION IN INDIA. Thus, my final question is, are we not trying inclusive growth and health for all, then how will it reach the grass root level? What's the opinion of World Bank on whole this issue?

53. Question on: HOW CAN WB HELP TO DEVELOP SOCIO-ECONOMIC MODEL TO GENERATE MORE ENTREPRENERS AND JOBS: Youths around the world are bubbling to go for entrepreneurship/ self-employment or even for a job! However, it's becoming difficult for some people to start a business due to so many formalities they have to complete. Hence, also, self-employment is directly proportional to employment generation. If jobs are not generated then, how could new generation get the jobs? So my first question is can WB help governments to reduce this process of starting business? One more concern is, WE AGAIN NEED TO BALANCE HUMAN RESOURCE BASED ECONOMIES AND TECHNOLOGIES BASED ECONOMIES, then only it will be possible. Hence, next question is CAN THE WB HELP GOVERNMENTS IN PLANNING SUCH SOCIO-ECONOMIC BUSINESS AND MANAGEMENT MODELS? TIME IS RUNNING OUT FASTER. WE NEED TO ACT FAST.

54. Question on: IN LATIN AMERICA ARE LOCAL CITIZENS MADE PART OF PROJECTS, AS MIDDLE CLASS GROWING PAST THE POOR: Congrats to Latin America for Middle Class growing past the poor. Great Achievement by itself. My question is, are governments realizing their worth? Are the governments making them part of public services? Does view of a Middle Class family taken seriously by each government? If not then, how can Government people solve the problems? It's not PPP model that will solve the problem, but, it's the local community be made part of the solution then it can solve the problem is what I started feeling. Thus, Public Private Partnership + Contribution of the local common fearless, sensible and wise public of the area where

work in progress of the project is going on can solve the problems. In fact, the local citizens may be made part of the project since its inception only, is what I feel.

- 55. Question on: ARE WE GOING TO DISCUSS INCLUSIVE GROWTH MODEL EVEN AFTER 100 YEARS?:** SINCE LONG, INCLUSIVE GROWTH IS BEEN TRIED BY EVERY NATION IN THEIR ANNUAL BUDGET, HOWEVER, THEY FAIL AGAIN AND AGAIN. CAN THE WORLD BANK ACT AS A REGULATOR? OTHERWISE, EVEN AFTER 100 YEARS WE'LL BE TALKING THESE BASIC FACTS AND HUMANITY WILL FACE ITS BIGGEST CHALLENGE AT THAT TIME CALLED HUNGER, EDUCATION AND HEALTH, AS ALL HAVE THE SAME CAUSE, AND THAT IS POVERTY.
- 56. Question on: WHY CAN'T THERE BE 10 ACCEPTED CURRENCIES AROUND THE WORLD THAN ONLY USD?** Though we are not against any nation or economy, still, we feel, why big economies always put a pressure on small economies? Can the small economies be made independent from this pressure? Can the world economy be made dollar independent? Why can't there be 10 accepted currencies around the world than only USD? The question is obvious when BRICS have got together recently to form their own cartel.
- 57. Question on: HOPE WB HAS CLEAR DEFINITION OF POVERTY UNLIKE EVER CHANGING DEFINITION IN MANY STATES:** Please don't mind for such a basic question. I hope World Bank is very clear with what is poverty and about its definition. It is observed that statisticians and governments play with the facts and figures to show poverty is reducing, whereas common man observes juxtapose and that is Poverty is growing day by day. Hence, how would World Bank work in conjunction with such Governments around the world?
- 58. Question on: WHY CAN'T UNO/ WB WORK PROACTIVELY? WILL MOST OF THE FUNDS IN FUTURE WILL GO FOR INFRASTRUCTURE**

DEVELOPMENT AROUND THE WORLD IN CLIMATE CHANGE?: India is facing extended Monsoon this year. Since, last 6 months it's raining. Thus, do you think, most of the funds of all the nations in future, might be devoted to infrastructure build up and maintenance only? The obvious reason being, roads gets washed away, telephone cables, water pipelines, electricity cables gets broken, hospitals got washed away, education institutes got washed away...thus, in that case, how could world bank help the nations and what would be its role? Will WB opt for going project by project basis or will it help the nations and work proactively?

59. Question on: REDUCING THE TIME BETWEEN UTILITIES PLANNED AND ACTUALLY DELIVERED TO END USERS: How can we reduce the time between these utilities are planned and the time it is actually delivered to the end users? Also, what are the best practices around the world that World Bank is thinking to implement to improve this service delivery?

60. Question on: DOES WORLD BANK HAVE A FAIL SAFE PALN TO ERADICATE PROVERTY AROUND THE WORLD?: Many have tried to eradicate poverty in India and around the world. They failed. Hence, how feasible is this poverty reduction program? Also, what are the steps that we at World Bank are taking to avoid such failures again?

61. GIVING IS FORGOTTEN IN THIS SELFIE AND SELF-FOCUSSED WORLD?: IN THIS WORLD OF EGOTISM I.E. "I-ME-MYSELF-MY ORGANIZATION-MY PRODUCT AND SERVICES", ONE THING THAT IS FORGOTTEN IS GIVING AND NOT ADVERTISING. In many Indian scripts it's mentioned that, 'what right hand donates even the left hand should not come to know'. Hence, the donations and giving and even CSR is not a big part of the Big Budgets of many individuals and organizations. None in corporate world agrees on the principle of 'the more you give, the more will come back to you'. It's not even part of many top Fortune listed companies, or if they have, they take more than

they give, is for sure. Then, how would these entities be encouraged to Giving, to Helping others, and the Welfare of all?Kindly let's also know, what will be the role of World Bank in these activities?...Kindly let's also know whether you've touched these points in your book?

62. Question on: DO YOU THINK, AFTER 200 YEARS AND LATER, SAME QUESTIONS AND SAME DISCUSSIONS WOULD TAKE PLACE AND MY GREAT-GREAT-GREAT-GREAT.....GRAND CHILDREN WILL BE ASKING THE SAME QUESTIONS TO YOUR COUNTER PARTS? : Since decades, building roads, providing electricity, and construction of toilets for every household are part of every year's Budget of every country, especially the developing countries, but, it could not be achieved, is also a fact. Thus, according to Governments these things are interlinked and are equally important. Now, the question is, can the World Bank take responsibility of keeping track on budgets and helping countries to keep record of every dollar/ taka/ cent / rupee / money/ franc spent on these activities? If not then after 2200 A. D. i.e. after 200 years, same questions and same discussions would take place and my great-great-great..... grandchildren will be asking the same question to your counter parts. Hope you don't laugh at this question. However, it's horrible reality of our lives, and hope you'll touch this point in your all-important discussion.

63. Question on: RIGHT TO EDUCATION RTE APPLICABLE TO POOR CHILDREN IN INDIA?: Hope Right to Education is applicable to poor people in India. This itself is a big question. Now, take a live case, if Government chooses children of poor to be taught, and the parents of those children are construction worker, then? The parents are going to migrate for the job, even to other cities, isn't it? Then how can they keep a track on it? Government machinery can keep a track, but not these illiterate poor people. Also, parents can't leave their children behind....There are hundreds of such cases I know....and thus children are left illiterate and parents are forced

to opt for job over education of children. Slowly, children also become earning source for parents in India and Bangladesh too. Also, education and coming out of poverty goes hand in hand in this part of the world. Thus, I believe that, trustworthy government machinery all across the country in conjunction with these poor people, and technology to support, along with NGO, SHO, and UNICEF, can only alleviate these poor out of poverty. Hope, you'll touch this point in your lecture. Thanks.

64. Question On: AGRICULTURE PRODUCE AND WARE HOUSES TO STORE: Hope, while the production of Agricultural Produce in increased, the storage houses will also be built simultaneously, so that the hard work of Agrarian/ Farmers are not wasted and the grains reach at proper places. Hope this point will be touched in this all important discussion.

65. Hope, in Africa, while the production of Agricultural Produce in increased, the storage houses will also be built simultaneously, so that the hard work of Agrarian/ Farmers are not wasted and the grains reach at proper places. Hope this point will be touched in this all important discussion.

66. Question on: IS HUMAN CIVILIZATION GOING TO FIGHT WARS FOR MILLIONS OF YEARS? : Is human civilization going to fight wars for millions of years? Why can't peace be restored in Africa? Why can't UNO and the World Bank become so powerful that they can keep the people/ organizations/ nations and other entities having vested interest away from Developing the Nation/ Region/ World? Sorry for direct question but, the day has come to call spade a spade, otherwise, progress and development of this world will be stalled for ever. Hope you'll touch this point in this important discussion.

67. Question on: ARE POLICY MAKERS AND IMPLEMENTER, SLOWER THAN THE ECONOMIC DOWN FALL, TAKE EXAMPLE, FOR DOWNFALL OF 2015 AND 2022 A.D. ARE WE READY? Are policy makers and implementer, slower than the economic down fall? IF IT IS ALREADY PREDICTED BY SCIENTISTS AND

RESEARCHERS INCLUDING ME, THAT IN 2015 AD OR 2022 AD, THERE WILL BE ECONOMIC DOWN FALL, THEN WHY THE POLICY MAKERS AND IMPLEMENTER DO NOT WORK OVER TIME TO MAKE THE ECONOMIES MOVE SMOOTHLY? Don't you feel there is something fishy? Hope you'll touch this point in this discussion.

68. Question on: IMBALANCE OF NATURE AND SUSTAINABLE DEVELOPMENT DUE TO PLANNED AND UNPLANNED ACTIVITIES: Most of the forest areas in China are getting destroyed due to planned and unplanned activities. Then how could this urbanization will remain sustainable, if imbalance in the nature takes place? My second question is, 'Is the formula of 33% land must be accommodated by jungles applicable in each urbanization/ national level projects'?

69. Question on: ABOUT AWARDED NOBEL PRIZE POSTHUMOUSLY: NOBEL COMMITTEE REPENTS ON, NOBEL PRIZE WAS NOT GIVEN TO MAHATMA GANDHI-JI, THEN WHY CAN'T IT BE GIVEN POSTHUMOUSLY? IF BHARAT RATNA CAN BE AMENDED WHY NOT NOBEL PRIZE?

70. Question on: DONATIONS BY SUPER RICH: WE'RE NOT AGAINST SUPER RICH, HOWEVER, IS IT NOT A FACT THAT ONLY THOSE CAN BE SUPER RICH WHO CAN MANAGE ALL STAKE HOLDERS, GOVERNMENT AND NON-GOVERNMENT BODIES AND OF COURSE THE NEGATIVE ELEMENTS IN SOCIETY? HAVE YOU TOUCHED THESE POINTS? ALSO DO YOU AGREE THAT SOMETIMES, COERCIVE COLLABORATIONS OF SUPER-RICH PEOPLE EVEN CAN TAKE THE TOLL OF FEW COUNTRIES' ECONOMIES? HOW CAN IT BE TACKLED? HOPE YOU'LL TOUCH THIS POINT IN YOUR DISCUSSION PLEASE. MILLIONS ARE DYING OF HUNGER, MILLIONS ARE NOT GETTING EMPLOYED, ETC. AND SINCE A CENTURY OR EVEN MORE TIME THAN THAT, WE COULD NOT FIND A SOLUTION OVER

THIS, HENCE, ALSO THIS QUESTION CAN BE RAISED TO SUPER RICH, AS IT'S A SAME CASE WHERE IN ROME/EARTH IS BURNING AND ...THESE KINGS ARE BUSY IN AMASSING MORE WEALTH ...

71. Mr. Warren Buffet, donated billions of dollars. Why cannot The World Bank, influence, organize and encourage other super rich for 'Giving More/ Donate More'? Also, hope the funds they are donated will be used for humane cause and it's each penny record will be transparent and seen by the world.
72. **Question on: INCLUSIVE GROWTH:** "Nobody is willing to solve this problem, but, are interested to earn their own bread", is the comment of the grand old genius here. Statistician and Economists putting the facts and figures and are analyzing it as they are paid. Dictators and 'Rulers' just want to let their way go ahead. Poor are left to god....Nobody has 'will to implement real solutions provided by reality experts' due to their own vested interest...god bless this earth.
73. **Question on: All river systems in India are dead and all water bodies including seas and oceans are getting polluted due to corruption:** I have come to the conclusion that due to corruption, the environment will get damaged, then mind of humans will get damaged, now one will trust that some good people are really there on this earth, slowly, ...if corruption is not stopped then human society will vanish from earth. The reason, it's due to corruption only the chemicals are thrown in the rivers and sea, look at Yamuna in Delhi, Nag river in Nagpur, Ganga in Kolkata, and sea near Mumbai....thus earth/land will be polluted, air will be polluted, skies will be polluted water will be polluted and lastly our mind will be polluted and we'll cease to exist....what is your opinion madam?
74. **Question on: Digital expansion and free speech, and benefit to all around the world:** What is social and social media strategy of UNO? How to profit from social media for human development? Will digital explosion and vested interests, benefit or dilute all our efforts, in case viruses and malware are

developed by negative elements in advanced and then we try to find solution on it after loss has been incurred?

75. Question on: Is The death of money a reality and is the collapse of international monetary system is also reality?:

First question: Is it a death or evolution?

Second question: Is it happening in organized way or in an un-organized way?

Third question: Will it benefit rich or poor individuals/countries!

Fourth question: When will be death of next currency (whatever that entity be) be expected?

76. Question on: Finland's Experience in Education: IT'S TIME, WE START DREAMING FOR 100% EDUCATED HUMAN BEING ON EARTH. OTHERWISE, IN 22ND CENTURY THE HUMANS SHIFTED ON MOON OR MARS WOULD START CALLING US, BACKWARD RACE AMONG THE HUMANS.....MAY BE AT THIS QUESTION YOU'LL LAUGH AT ME, BUT, WHEN IT HAPPENS THEN, ...WE'LL BE LAUGHED. HOPE FINLAND WILL SHARE THEIR EXPERTISE IN IMPLEMENTING 100% LITERACY, AT THE WORLD LEVEL.....

77. Congrats for successes fully implementing education reforms to Finlanders. They were among the first to implement Right To Education Act (RTE) in their country, being small country and willing to implement, they seem to be successful too. Thus both corollaries are true. Now, the question is how can they help other countries? Also, why cannot their expert implementers help other 135 countries, where RTE is there but are not successful? If it doesn't happen then Education to all, will forever, remain Human Dream, and might be in 22nd century man will colonies moon, with highly educated beings, and back home on earth, those living on moon will call us, the relatively illiterate society. Hope you'll touch this point. Thus, each successful country will educate at least a million in a span of a decade innot so educated countries....could be a better aim for human society in future. Sustenance of human

civilization is at stake hence also, I believe, you all would discuss, these points, please.

- 78. Question on: 'Discussion on: Google Hangout':** Youth around the world expect similar things as such, like good education, job, etc. However, time and again it's observed that some of them cannot achieve that. Will these hangouts help them achieve their goals in their lives?
- 79. Question on: Municipal Finances the handbook to local government, time is wasted than invested:** Please check many **Municipal Corporations** in the world. What irrigation department does is not known to the electrification department, what road building department does is not known to the electricity and irrigation departments....thus total chaos ruin all the budgets and hopes of the civilians. To whom to ask and who will reply to it and who should be held responsible for this? Such questions are raised by many older friends from Detroit to Delhi to Dehradun to Dhaka, Bandung to Bombay, Nagpur to Nainital, Kedarnath to Badrinath, Hope you will touch this point in your important discussion, as its public money and hard earned taxes that are wasted rather than invested.
- 80. Question on: Housing Finance in Emergency Market:** MANY OF MY COLLEAGUES ARE WILLING TO BUY HOUSE OF THEIR OWN HOWEVER 85% LOAN CRITERIA KILLS THEIR DREAMS AS THEY DON'T HAVE BLACK MONEY. THUS, MY QUESTION IS THOSE WHO ARE SERIOUS TO BUY HOUSE, WILL BE ANYHOW SERIOUS EVEN IF IT'S MADE 1% OR 5% OR 10% OF OWN PAYMENT AND 99% TO 95% TO 90% LOAN CRITERIA. THEN WHY NOT GOVERNMENTS TAKE SUCH MEASURES? IT WILL BRING WHITE MONEY IN THE INFRASTRUCTURE MARKET. OTHERWISE THE INFRA BOOM WILL ALSO BURST LIKE DOTCOM BURST, IS WHAT MOST OF US FEEL. THIS WILL ALSO BRING ONLY WHITE MONEY IN THE MARKET. Hope you'll touch this point in your discussion.

- 81. Question on: Hydrofracking what everyone need to know and Research and Development is not given priority:** I'm sorry to say, but, Research and Development is not given much importance is also a conclusion some Engineers are drawing from this discussion. At least I feel it's too slow at all 'Energy' fronts. Also, whole energy sector is behind amassing wealth or grabbing more and more oil and gas blocks, etc. Hope you'll touch this point in discussion.
- 82. Question on: Digital Engagement and closing feedback loop from village level to space age projects:** "Governance, Compliance of the projects, and closing Feedback loop must go hand in hand then only true development is possible in all the Government and Non-Government public projects right from village level to space age projects," Dr. Ashish Manohar Urkude, once proclaimed this in UNESCO conference in Budapest Hungary in 2006 and all the scientists agreed upon it. Hope you'll touch this point in your important discussion.
- 83. Question on: Art Exhibition on Gender-Based Violence: With President Dr. Jim Yong Kim, of World Bank on May 23, 2014/ Friday:** Education, right from early age, is the best solution to tackle problems of women, many believe this. May it be through moral education, and formal education? However, it's also true that if you claim here that, it's happening even in educated and high literate countries then, what could be the solution to this problem? Why can't it happen all over the world that by 1 January 2015 A.D. all women will be dealt or given equal status to that of men in all the Laws/ Legal framework around the world, in all the countries? Also, 'for coming 100 years (2015 to 2115 A.D.)there will be no war'....If such dramatic and drastic solutions are not implemented then trust me for millions of years wars will be fought and women will also be abused....which I believe none of us will like...Hope you'll discuss this all important point in your important discussion, please.
- 84. Question on: Open Data policy:** Our family always supported free education, free knowledge, free healthcare to all

and welfare of all, concept. The simple example and reason is given below. Just, imagine, open access would not have been there, the concept of "ZERO" in mathematics would not have been out/ open to the world, from India. Then? We're running computers on this concept only due to open data policy only. Thus, open access to data, information and knowledge will lead to WISDOM and will definitely boost the global economy is what we feel. Hope this point will be covered in your all-important discussion.

85. Imagine a top Business School or Technology School or Engineering School or Law School, or Medical School or Pharmaceutical School, Literature School, Arts School, Music School, Yoga School, Martial Art School, etc. does a research and keeps copyright by renewing every year for 1000 years and none buy it may be in extreme circumstances, flood or famine comes and it's washed away or get dumped. Does not it, will lose its relevance? Imagine, I as an individual right an article with all detailed data/ info/ knowledge/ wisdom / implementation strategy and put it on open access and countries implement those things and change for betterment of humanity. What will be useful? Obviously later. That's the impact of open data and access and transparency. What is the use of your existence if your work is not useful to benefit this world? Hope this point finds its place in your all-important discussion.

86. Question on: What Grades would you give to teachers in your country: I would rate my teachers who taught me till today as the best, right from Primary Education till Ph.D. Now, when future rating is concerned it should be holistic rather than just/only performance based. In India Guru is Guru, who is beyond rating and value, as s/he stands for legacy that has been there since ages. Hence, it's presumed that apart from her/ his basic qualification s/he must have skills to build values and ethics in the students along with skills and knowledge s/he can deliver to next generation that leads them to live a wiser life. Hence, I'm recommending a holistic education and evaluation system, here for the next generations.

- 87. Question on: Lessons for inclusive growth from the USA and the world:** If it's called inclusive growth/ economy in case of USA, then, why it fails every now and then, was the obvious question I faced in the classes of international Marketing I took. Once, I got tired of answering all the questions with all relevant economics, business and commerce and management answers. The class lasted for more than 5 hours. Students point was, "If the economy is inclusive and good and favorable to all, then it must be sustained from the people, by the people, and for the people". Thus, also, students felt that, only those economies go down, which are anti-masses and are more favorable to classes, and one of them was USA economy..... Your expert comment/s on these questions will be really welcome by the new generation students and citizens around the world. Please note I'm not against any country, any state, any organization or any individual but as I'm concerned about this world hence this question.
- 88. Question on: Artificial shortage created by some forces, and rise in food prices, and similar discussion in the year 3014 AD i.e. 1000 years later:** Please comment on the artificial shortage and its impact on increase in food prices. Why not a permanent law and regulators be enforced around the world in all the nations over this issue? Why always poor, needy, and villagers suffer over food issue around the world? Are we going to find out a permanent answer and solution to/on this issue or are we going to earn our salaries over such discussions only? Sorry for frank question, but, I can see/ visualize....the year 3014 A.D. i.e. 1000 years later also same discussion going on this food issue, hence, these questions on food issue.
- 89. Question on: All Governments around the world are 'close', i.e. not open to discussion or not open to provide everything at grass root level:** The discussion topic proves that almost all the governments around the world are almost "close" i.e. are not willing listen, and are not so much "responsive" too. Now, the question is are they willing to listen and become

responsive? Another factor, every 5 years government changes, then, can the governments become open and responsive too in that period? Why not system, processes are built up for responsive and open governments in all the countries around the globe? Are we willing or just going to do lip services forever? Hope this hottest issue will be touched by World Bank, for the welfare of whole humankind, being a UNO body.

90. **Question on: Whole world requires training on sharing riches:** I think, the whole world requires training on sharing riches. The increase in inequality around the world shows, the knowledgeable or skillful or riches want to hold their jobs at the cost of others, whereas, everyone must share his knowledge and skills and wealth with at least one more person every year, in an ideal situation. Thus within 10 years, this world can come out of inequality. Why people have fear to lose their everything? In fact, by giving more you earn more is experience of many, because the moment a person gives away his/ her skills or knowledge the next moment s/he goes to higher position. Don't know when the society will be more accommodative and sharing. At such speed, the day is not away when, elite humans living on moon or mars will hate to come back on earth, due to framework and mindset of earthiens.

91. **Question on Renewable Energy Challenge:** One of the biggest challenge of Renewable Energy is technology is known, however, cannot be utilized as it is patented by some entity and also it's costly. Hope, you'll touch this point. The reason to touch this point is, once the technology is being used many improvements are possible. However, if it is dumped as a patent, further improvements will be hampered. Hope you'll discuss this major issue in your all-important discussion.

92. **Question on: Learning from Detroit Effect = Profit is not only and only motive of any business and global trade value chain, if it has to sustain:** Hope Detroit downfall has proved that not only in USA but also around the world, also, not only in public sector but also in private sector, only and only profit cannot be the motive of any organization. E.g. For earning

more profit only, Big 3 started outsourcing to cheaper manufacturers all over the world. Now, none of USA automobile giant is top Automobile Company in the world. What we called BIG 3 as GM, Ford and DCX, has been already looked changed Toyota, and Volkswagen, has become the top two. China has more than couple of dozen auto companies which could be among the top 25 in the world soon due to, unique CHINESE ABILITY TO CONNECTING TO POOR AND MANUFACTURING EVERYTHING AT CHEAPER COST BY MAKING SKILLS KNOWN AT THE BOTTOM OF THE PYRAMID. Hope you'll touch this point. <http://live.worldbank.org/transforming-world-trade-global-value-chains-and-development>

93. **Question on: UNO, WB and Government and non-government organizations and individuals shedding responsibility of implementation of idealistic MDG:** There are every facts, and figures, known to the world. Still, for at least a thousand years, this world, I mean it, not only India but, this world will remain land of extremes, because, neither UNO nor World Bank, neither each country nor each province, neither politicians nor spiritualists, neither businessmen nor educationists, neither philanthropists nor socialists, neither rich nor poor, neither highly literate nor illiterate, neither military organizations not civil organizations, neither all so called good NGO's nor SHO's, neither all males not all females, neither environmentalists nor deforests creators, neither capitalists not communists, are serious about coming out of this problem. Everybody wants someone else to sacrifice and work hard; none wants to start from them. Sorry for frank remarks but, it is also a fact by now and hope this point will be discussed in this important discussion. This point I'm raising, because, last time when I asked the question about MDG, the buck of implementation was passed on the countries by Chief Economists of World Bank. This shedding of responsibility and saving job, has become common in all the organizations around the world, in all Government or non-Government or even in WB

and UNO. Hope, this teething problem will be solved soon by this world. I'm concerned hence, this question. (Discussion over <http://live.worldbank.org/is-south-asia-still-land-of-extremes>)

94. Question on: Isolation of fragile state to avoid spillover effects on neighboring states/ regions: Hope at WB/ UNO level we do have a plan to stop the spillover or direct effect of 'fragile state effects/ affects' on the neighboring countries, otherwise, building a reliable business atmosphere will be difficult in future, and more countries could become fragile states, which could be daunting challenge and hence, this concern. (Financing the fragile and conflict affected states <http://live.worldbank.org/financing-fragile-and-conflict-states>)

95. Question on: According to statisticians and economists, only few got benefitted in Asian and African States: It has been observed by many Economists and Statisticians that only some hundred odd political or business power houses in Africa and Asia have more benefited than riches reaching to common man. Later, these people also have become ruler or politically accepted leaders as well in lot of countries, and as these leaders have imperialistic mindset hence they cannot share their wealth with so called common man. The best examples are growing billionaires in India. Thus, proving, change in mindset is the best solution over this. Now, what world Bank is doing to change this mind set of leaders, businessmen and politicians of Africa and Asia? Finally, we feel, this is world over phenomenon, those who hold power and / or money, it may be individual or organisations or states, they do not want to share and lose their importance and want to remain special stars or persons or states or organisations. What UNO and World Bank is doing to let everyone including poor countries, and individual feel that they are also important in this integrated world? Also, why world bank do not target the governments of the states, for getting desired results over this issue? Sorry for this direct question but my question was not answered last time, hence,

raised this more direct question, as it has direct effect on African and Asian continent. Of course, I do not target directly any individuals as I'm not against any individual, but lot of researchers have quoted their names which I can include next time with proper references, if you wish. Come on, and please note, I 'm concerned and hence these questions, as I've started feeling that even after 1000 years or 1000000 years also we'll be discussing these questions as none is serious to implement idealistic solutions that I want to implement or you want to implement as well. Hope these questions will find place in your discussions. (<http://live.worldbank.org/making-everyone-count#question>)

And (<http://live.worldbank.org/africa-sharing-economic-growth>)

96. **Question on: Isn't it short-sightedness of WB and Governments to invest in cities like Mumbai and Kolkata, if they are getting drowned after 100 years, according to scientists:** If it is predicted that Mumbai and Kolkata are going to be drowned in sea within 100 odd years due to global warming, then why Indian Government is investing trillions of dollars there and not in the safer cities like Nagpur, which is centrally located in India? Why not slow migration is planned in advanced to vacate these cities like Kolkata and Mumbai? None listens to me in India hence, raising question at world level, as it's matter of worth 10 trillion USD and lives of more than 500 million people, by that time. Similar things are applicable for Dhaka in Bangladesh, Male in Maldives, and other places. Are we so obsessed with short term goals that we are forgetting to invest in future of human civilization? Why idealistic, devoted, truthful and honest people like me are always sidelined? Why UNO and WB do not call us to serve them, and rather ask us to apply 100 times to serve them? Are the jobs in WB and UNO fixed and are not merit based and inclusive, for such cause too, and just to benefit few countries? Frankly, even if you don't call to serve, still, if such questions are being raised it means existence of UNO and WB itself is in trouble as people are losing faith in them, and it doesn't mind, even though their

visibility it increasing still their contribution is being doubted by 'many' is the conclusion and is matter of greater to greatest concern. Hope, these teething question are touched in this discussion. As also a past citizen of Mumbai, I'm interested in inclusive growth hence also this question. (<http://live.worldbank.org/cities-and-citizen>)

- 97. Question on: Bullying in Live discussion and avoiding genuine questionnaire even at WB and UNO level:** Also, I've a simple objection over here, the questions which are asked first should be dealt first, but, some people bully over the live discussion and then his/ her questions are answered first. Any how it's up to you to decide which question you can answer and avoid, but, sooner of later, such teething questions, this world will have to take care.
- 98. Question on: Can world bank act proactively on 2015 AD and 2022 AD economic down fall?:** Hope these genuine questions are answered in this important discussion, as I'm really concerned about future of this world, as I've already predicted long back that there will be depression in some part world over economies in the year 2015 i.e. next year, and then in 2022, and this cycle years of depression will reduce later from 7 years to 3 years, etc. unless some amicable solutions are not found out, and world is not freed from Wars and extreme inequalities, and if MDG are not achieved in prescribed time.
- 99. Question on: Leaders eat last: Why some teams pull together while some not:** Hope you agree that the more selfless people you have in your team with focused approach with all possible required skills, authorities and attributes; the more chances you've for winning. Hope you've touched this point in successful teams.
- 100. Question on: Levant Economic Integration: Hard Talk with the Chief Economists:** Why can't the success story of Western Europe at Economic fronts be repeated in, SAARC, and Levant? Why artificial barriers, and road blocks are created on purpose by top authorities around the world? Why can't people in this part and around the world live and let others live

in peace and prosperity? Hope these points will get place in your all-important discussion.

101. Question on: Google Hangout - Youth and Open Government in Sports: What Can We Learn from the World Cup? The Question: Since, 1982, I've watched all football world cup final gold cup match. Hence, my observation is that billions watch these matches, thus lot of man hours if I say invested, some people say man-hours wasted, that too for almost a month i.e. more than 30 days, while matches are there. So calculations come out to be not 9.5 Trillion Dollars but more than 12 Trillion dollars. So, at the end of the day, when you say no transparencies in transactions are there in such sports, then, is this worth an investment? Hope you'll touch this point in this Google Hangout.

102. Legacy of our ancestors: "Wealth of Nation" put by Adams Smith, is a very big word and inclusive philosophy itself. If he forgets to write some part of it, that doesn't mean he neglected something....e.g. if he is not a Medical Practitioner orhe will not write about that...hope...this point will be discussed well. Alfred Noble or Einstein or Gandhi or Buddha orall have made their mark and we've to move, think something higher and level further...with more inclusive and more conclusive ...let's respect the legacy set by our ancestors from which so ever country or race or religion or caste or creed or city ormay be.

103. On Honest Land Management: It may be India or Africa or USA, the best way to deal with environment is honest land management. Hope you'll cover this point in your all-important discussion.

Please note: All questions appear on WWW, some grammatical or typographical corrections I've made there committed during live discussion are corrected over here.
